

Caspak Quality and Food Safety Policy

Caspak (Caspak Products Pty Ltd) situated at 4-6/8 Sugar Gum Court, Braeside Victoria 3195, has established a reputation as a consistent provider of safe quality food packaging. The company continues to excel in the importing, manufacturing, warehousing and delivery of food packaging products such as films, pouches and fibre products. Caspak is fitted with an on-site laboratory, raw materials, manufacturing and finished products storage warehouse, quarantine area, and loading and unloading facilities. The company intends to maintain its high standards of service and offering of food grade packaging products by:

- Promoting and enhancing a food safety and quality culture throughout the business.
- Constant surveillance and encouragement of our suppliers and stakeholders with regard to food safety and quality.
- Ensuring we consider sustainability, environment and climate as part of our operations and the impacts we make as a business.
- Consistently providing only safe quality food packaging to the marketplace with legal and safe products, fit for purpose.
- Continuing our high standards of customer service and responsiveness.
- Continuous improvement and development of our risk-based Food Safety and Quality System, which is based on the international standard ISO 9001:2015, GMP and CODEX HACCP principles.
- Meeting all legal food packaging regulatory standards including Australian Packaging Covenant Organisation (APCO) Packaging Sustainability Framework Criteria and Forest Stewardship Council (FSC) Standard for Chain of Custody Certification.
- Assessing and monitoring critical suppliers and sub-contractors for their ability to provide the high standards that we pursue for our customers; and
- Maintaining a competent and committed workforce through training and employee participation.

The success of this food safety and quality policy relies on all staff having the necessary skills and knowledge to perform their role, and the willingness to participate in developing the food safety and quality culture of the business.

Senior management fully endorses this food safety and quality policy and formal quality and food safety management based on these principles.

Bryce Hickmott
